

Success Story

Ajay Kumar 16 year old young boy lives in Kali Mahal slum area under Mughalsarai belonging to very poor family. His family total 7 member including father, three sister and four brother, his mother no more in the family. He was suffering from fever, chest pain, lose of weight from one year and never went to doctor instead he was having faith on negative spiritual power. One day Prayas welfare association has been organized community meeting in the slum area of Kali Mahal. During the community meeting his family contact with Mr. Sanjay Kumar community volunteer of Prayas welfare association and share his poor health and family status. Mr Sanjay Kumar community volunteer identified some of the symptoms relating TB and he convinced them for medical supervision and advised for sputum test. Then he said we have not able to reach to DMC for his sputum examination because my father is riksha puller most of time in the work. On this situation Community volunteer provide them sputum container for store morning sputum after that second day community volunteer visit his home and collect both the sample of sputum.

Ajay Kumar 16 Year young TB patient

After the sputum examination he diagnosed TB and start DOTS through DOTS Provider but after the one week, when he was taking drugs suffering many complications. On this situation drop his treatment. One day DC Axshya project and NGO head Mr. Sandeep Rai visited his home on routine visit of TB patient. During the visit he was found that Ajay Kumar going to default then DC Axshya project and Sandeep Rai convinced for start his treatment. He realized them when you are not taking DOTS then how many complications faced. Ajay Father said I am very poor and I have no money for better treatment. He also said DOTS Provider very rude behavior with us when we have went his clinic. After that DC and NGO volunteer and Ajay father visit to DOT provider clinic and mobilized them your good behavior and support make cure to Ajay Kumar.
