

## AXSHYA SAMVAD

### MORENA

#### Block- Sabalgarh

Villages in Sabalgarh block are located in remote areas. Though there is road connectivity but the distance from the block is about 50 km and the location is deserted. The condition of the villages is upsetting. Project Axshya identified villages vulnerable as

well marginalized (Hard to reach) areas and started the activities in collaboration with local AS CV Mr. Manish Baisender.

Mr. Manish Baisender (Project Axshya) started intervention in the villages in 2018-2019 with Axshya Samvad. Since the Block was highly vulnerable and previously just GKS and community event was not sufficient to tackle the problem, therefore Axshya Samvad nearby villages of Sabalgarh Block was conducted. Approximately 5000 Axshya Samvad has been conducted in this block and 480 presumptive TB patients and about 45 positive cases have been identified.

Project Axshya identified Mr. Manish Baisender as volunteer for sputum collection and transportation. We are committed to make the villages TB free. And we have been quite successful in our task till now. Till now we have completed house visits to almost all the suspects, Axshya Samvad has been strengthened enough to promote the disease and the community is well aware of the symptoms and cure of TB. CM&HO and DTO appreciated to Axshya Team Sabalgarh achievements.
